

HAGNECK Power Plant, Switzerland

Application: Stilling Basin, water channel, driveways
Customer: Bielersee Kraftwerke AG
Object: Water Power Plant
Country: Switzerland
Year: 2014
Fibre: Fibrofor High Grade

Description

The efficiency of the water power plant shall be increased plus the environment shall be up-graded ecologically with various measures.

Key advantages of the Fibrofor High Grade Solution for this project

- Improved resistance against abrasion
- Lower cost for reinforcement (replacement or reduction of steel)
- Faster construction progress
- Improved shrinkage characteristics of concrete
- No corrosion
