

LEGO Werk, Nyíregyháza (HU)

Application: Industrial floor
Customer: Lego
Object: Production hall and offices
Size: 120 000 m²
Country: Hungary
Year: 2013
Fibre: Fibrofor High Grade

Key advantages of the Fibrofor High Grade Solution

- Lower cost for reinforcement (replacement or reduction of steel)
- No or massively reduced laborcost (no/less installation of the steel)
- All kind of surface treatment possible (also coating)
- Improved shrinkage characteristics of concrete
- Lower future maintenance cost
- More flexible usage of the floor due to jointless slabs
- No corrosion and resistance against all known additives
- Free of charge state-of-the-art **static calculation (finite elements) based on latest standards (Eurocode 2)**
